

No Giving Up

I am Colter. These are words for the essay each with paragraphs of explanations.

Never give up:

I study for school all the time. I make sure I obtain great grades for a college application (I hope to go to M.I.T.). If I get bad grades I will keep going and then obtain great ones. Some subjects might take more work than others. Just keep trying.

Expect to win:

Let's think, so if you're in a soccer or football game ect. you're down 10 points and you think you're going to lose. But your team expects to win so they keep going and you win the game. Look to win, not fail.

Believe in yourself :

Let's say you're on a hard test and all you say is I can't do this or this is too hard. But you yourself know that you can do this and just know to believe in yourself. Think good thoughts about what you can do and what you know.

Aim high:

To aim high you have to dream. Your dream is what you're going for a career such as an astronaut or an Engineer that's your dream. So aim high for your goal don't settle for what is easy.

Use your brain:

You need your brain so you can remember where things are and your notes for college. If you can remember your notes, you can obtain fantastic grades so you can obtain a great job so you can earn money to live life.

Be ready to go:

This is the last one. When you're getting ready for school what do you need, maybe a backpack, notebook, pencils, and water bottle. But yesterday you lost your bag and you said you would look for it tomorrow the next day you're looking for it and you can't find it and then you're late for class. But when you look for it that day, keep it where you will remember it and then you won't have it lost and you won't be late. You will do better in school and not have to make excuses.
