

'Expect the Unexpected'

Do you have goals? I bet you do, some people don't though and some people do and some people quit when they're right there about to achieve them. Even though life is hard and very unexpected, you have to find your path that will help you reach your goals and dreams even when obstacles try to bring you down..

Aim high means you're trying to get first and not second. You always are trying to get up high and you don't like to come in second, and that means that you're trying, giving all you have and trying to win it all. Also, aiming high is important to me because when you're playing a competitive sport if you aren't aiming high you're going to fall short, and I hate losing.

Believing in yourself is the most important thing in my opinion, because if you don't believe in yourself you will not succeed in what you're doing. You will have low grades and you will not succeed in sports. If I don't believe in myself nobody will believe in me either. I would hate it if that happened. It would be very hard to be happy if that happened. For instance, I would probably feel like I have no friends since friends are supposed to support you. That's why I believe that trusting in yourself is important.

Having faith in yourself isn't just a thing people do to trust themselves more. It can help you to trust in other people too and that is a very important thing in everyone's life. If you didn't have faith in yourself or other people, you wouldn't be able to do anything you do and you would be a disaster. That's why I think having faith in yourself is very important.

All in all those are my principles and that is why I believe it is important to believe in yourself, have faith in yourself, and aim high in your goals. I don't want to let myself down. Maybe by working hard and focusing on these principles I can be a positive example for others, too.
