

Lukas Fulkerson  
5th Grade

Have you ever wondered if there's one, two, or three ways to succeed? If you picked three, that's how many I'm going to talk about! I'll tell you how to succeed in life with three steps..

The first step is to use your brain. If you use your brain you can graduate school and college if you want. You can also learn new things. For example, if you aren't good at spelling then spelling tests will be hard if you do not study.

The second step is to believe in yourself. If you do believe in yourself you won't want to ever quit and you won't have to worry about feeling doubt.

The final step is expect to win. When you believe you can achieve, you can win at almost anything. So now you have learned some steps to succeed in life. And here's some bonus steps. Bonus step one is never quit. If you never quit you can believe in yourself more and you can do other things like ride a bike or beat video game bosses. Bonus step number two is be ready to go. For example, be ready to go outside when you go to work or somewhere else. It has been cold this week so to be ready to go outside you will need a coat.

I like to talk about aiming high. If you aim high you get to complete goals and you will achieve and believe. For example if you are trying to build a LEGO set it might take you hours, but if you aim high and work together it can be done faster. So that is my three ways including three bonus ones to succeed in life whether you are young or older.
